MINI ALLIGATOR TOURS™

WARNING:

- ▶ *NEVER attempt to swim after a stalled RC boat!*
- ▶ *Never operate your RC boat while standing in the water.*
- ▶ *Never operate your RC boat in the presence of swimmers.*
- ▶ *Always use a Personal Flotation Device (PFD) when boarding and operating your retrieval craft, i.e. Jon boat or duck boat.*
NOTE: Because of the sharp running hardware included with this RC boat, we do not recommend a rubber blow up raft.
- ▶ *RC boat running hardware is very sharp. Be very careful when working on and around the metal parts.*
- ▶ *While the engine is running pay close attention to the propeller. Do not come in contact with the propeller at any time the engine is running or serious injury will result.*
- ▶ *AquaCraft products are to be used by ages 14 and over.*

INTRODUCTION & DESCRIPTION CHANGES

Thank you for purchasing the AquaCraft Mini Alligator Tours! We want the time you spend with your new RC boat to be fun and successful so please fully read the manual. If for any reason you think this RC model is not for you, return it to your local hobby dealer immediately. Your hobby dealer cannot accept returns on any model after final assembly or after your boat has been operated.

All pictures, descriptions, and specifications found in this instruction manual are subject to change without notice. AquaCraft maintains no responsibility for inadvertent errors in this manual.

FEATURES & SPECIFICATIONS

BOAT SPECIFICATIONS:

Length 18-1/4" (463mm)
Height 7-1/4" (183mm)
Width 7" (177mm)
Weight 24.6oz

POWER SYSTEM:

380 Brushed Motor
7.2V 6-cell 1100mAh NiMH Battery
12V DC Quick Charger

CONTROL SYSTEM:

3-Channel Pistol Grip Transmitter
2n/ESC/Rx Combo Unit
Micro Steering Servo

BOAT FEATURES:

Magnetic Hatch
Twin Air Rudders
Molded Air Propeller
Tough ABS Construction

ITEMS INCLUDED

- ◆ Mini Alligator Tours Airboat
- ◆ Tactic TTX300 Transmitter
- ◆ 7.2V 6 cell NiMH battery
- ◆ 12V Quick Charger

ITEMS REQUIRED

- ◆ Four "AA" batteries

WARRANTY SERVICE

AquaCraft will warrant your model for 90 days after the purchase from defects in materials or workmanship of original manufacture. AquaCraft, at their option, will repair or replace at no charge, the incorrectly made part. This warranty does not cover damage caused by crash, abuse, misuse, alteration or accident. To return your boat for service you need to provide proof of purchase. Your store receipt or product invoice will suffice.

IN NO EVENT SHALL THE PURCHASER BE ENTITLED TO ANY INCIDENTAL, SPECIAL, INDIRECT OR CONSEQUENTIAL DAMAGES, WHETHER RESULTING FROM THE USE, MISUSE OR INABILITY TO USE THE PRODUCT OR FROM DEFECTS IN THE PRODUCT.

This warranty gives you specific legal rights and you may also have other rights, which vary from state to state. Outside USA and Canada, contact local importer for warranty information.

SAFETY PRECAUTIONS

- ◆ **Never, ever, attempt to swim after a stalled RC boat. DO NOT get in the water for any reason to retrieve your boat. Your Mini Alligator Tours has flotation added to the interior of the hull and the cowl. They will not sink. To aid you in retrieving a stalled RC boat you can use a fishing reel with a tennis ball tied to the end of the line. Or better yet, get yourself a small Jon boat so you can row out and pick up your boat. Remember to use a PFD any time you enter your retrieval craft.**
- ◆ AquaCraft products are to be used by ages 14 and over.
- ◆ Do not touch the propeller anytime the engine is running. Pay equally close attention to items such as loose clothing, shirtsleeves, ties, scarves, long hair or anything that may become entangled in the spinning prop. If your fingers, hands, etc. come in contact with the spinning propeller, you may be severely injured.
- ◆ The speed and mass of this boat can inflict property damage and severe personal injury if a collision occurs. Never run this boat in the presence of swimmers or where the possibility of collision with people or property exists.
- ◆ This boat is controlled by radio signals, which are susceptible to possible interference from other R/C transmitters, paging systems, or other electrical noise.
- ◆ If your Mini Alligator Tours should happen to lose power, water currents will slowly carry it to shore. The bad news is that the boat could be carried to the opposite shore. When surveying areas to run your model, keep variables in mind such as wind direction, size of the lake, etc. It is not advisable to run R/C boats on any free-flowing bodies of water such as creeks or rivers.

SETUP AND OPERATION

Plug the charger into a car power socket. The charger will start beeping and the light will flash. Connect the battery pack to the battery end of the charger. The charger will stop beeping and the light will stop flashing. You will know charging is complete when the charger starts to beep again and the light begins to flash.

Install four "AA" batteries into the bottom of the transmitter.

Turn the transmitter on, making sure the power light is glowing.

Lift the rear edge of the seat compartment and rotate the radio box cover up. Place it to the side.

Remove and place the hook and loop to the bottom of the battery pack.

Place the charged battery into the open compartment and plug the battery into the boat. You will hear a faint "BEEP."

Check the steering direction to make sure when the wheel is turned right or left the twin rudders correspond in the proper direction.

Throttle Operation:

Fully Squeeze Trigger, hold one second, "BEEP"
 Release Trigger, wait one second, "BEEP-BEEP"
 (do not push forward)
 Your boat is now ready to operate

OPERATION TIPS

Your Mini Alligator Tours is best suited for smaller bodies of water. Also keep in mind that winds can overpower your Mini Alligator Tours and cause you to lose control of the boat. Although this boat has a smooth bottom and is capable of skimming over semi-submerged obstacles, it is good to note that the boat could become stuck on that debris, so be careful as you run your boat. NEVER SWIM FOR A STALLED BOAT!

After you're done running your boat for the day, be sure to unplug the battery and remove it from the boat. Leave the cover off the radio compartment overnight to allow any moisture to evaporate.

REPLACEMENT PARTS

To order replacement parts for the AquaCraft Mini Alligator Tours, use the order numbers in the replacement parts list that follows. Replacement parts can be purchased from your local hobby shop or by mail order. If you need assistance locating a dealer to purchase parts, visit www.aquacraft.com and click on "Where to buy".
